

Neuenhaus, December 2022

**Neuenhauser Umwelttechnik becomes an independent limited company:
Growth with new production facility**

Dear Business Partner,

We are pleased to inform you that Neuenhauser Umwelttechnik will become an independent company on 1 January 2023. The new limited company will remain a wholly owned subsidiary of Neuenhauser Group and trade under the new name of "**Neuenhauser Recycling Technology GmbH**". This step enables us to act even more independently on the market and take decisions centrally and efficiently.

Neuenhauser Recycling Technology GmbH will move to a new state-of-the-art production site, not far from the headquarters in Neuenhaus. There will be a significantly larger manufacturing area with close proximity to the motorway network, which means easier access for our customers and business partners.

We take responsibility seriously: quality, continuity and reliability remain our top priorities - as an independent company within the Neuenhauser Group, we look forward to continuing to implement exciting projects with you.

The company's previous focus on the production of mobile machines and stationary plants will not change. Please speak to your usual experienced points of contact who will be available to offer advice and support at all times.

With Neuenhauser Recycling Technology GmbH you will therefore have an even stronger partner at your side when it comes to mobile individual components or system solutions.

We look forward to an exciting future with you as a partner at our side.

With kind regards,

Rüdiger Schury

Wolfgang Brouwer
